

Marcel MILLE

Cows, authentic regional images, fertile and promising custodians riches of life, unchanging and timeless remains, generous and promising familiar abundance, grouped or isolated, pending or wealth to future crops. Symbols of preserved treasures of the earth. Rock Cows, stone Cows, present from the start since Human History, foster mothers of majestic eternety, that's what we feel in front of one of Marcel Mille's cows. Eloquent look, unshakable calmness, soft dress, greedy snout, they have the quiet elegance and an almost touchable sensuality. They always keep that serene beauty that suits them so well. So present that it's almost disturbing.

Marcel Mille was born in 1938 in Besançon .
