Camil Giralt

The work of catalan artist Camil Giralt reflects his need for inner balance, which is explained by concepts such as calm, silence and distance from everything and everyone. In his paintings, this is shown through the balance between form, space and colour, and they are the result of a review of his own work and the constant search for new means of expression.

He uses few elements, with a limited colour range, and works with different techniques that he has developed over the years, using inks and paints on quartz bases, or handmade paper, to achieve different results and textures with which he feels a connection.

BIOGRAPHY

Camil Giralt was born in Barcelona in 1965, where he lives and works. He studied music and piano and pursued a degree in telecommunications engineering as well as a master's degree in business management, which was the basis of his previous professional experience, until he decided to dedicate himself exclusively to painting, his true passion since his youth.
