Press Release

Van Gogh's *Starry Night* has become an iconic work because it intensely captures that universal feeling of vertigo and wonder when gazing at the night sky. Other artists, across different eras and styles, have also attempted to capture this celestial poetry: whether it be Friedrich's romantic skies, Miró's dreamlike constellations or contemporary cosmic photographs, each offers a sensitive vision of infinity. This selection of works explores the dialogue between man and the stars, between dream, mystery and contemplation. Look at the stars, look how they shine for you...
